

## Getting Started in CCASS

### Inputting an Evaluation Using RMS.

The following is not intended as a user's manual for CCASS or RMS. This was prepared solely as a guide explaining the interface between RMS and CCASS. For detailed instructions on either system, refer to the respective user's manuals.

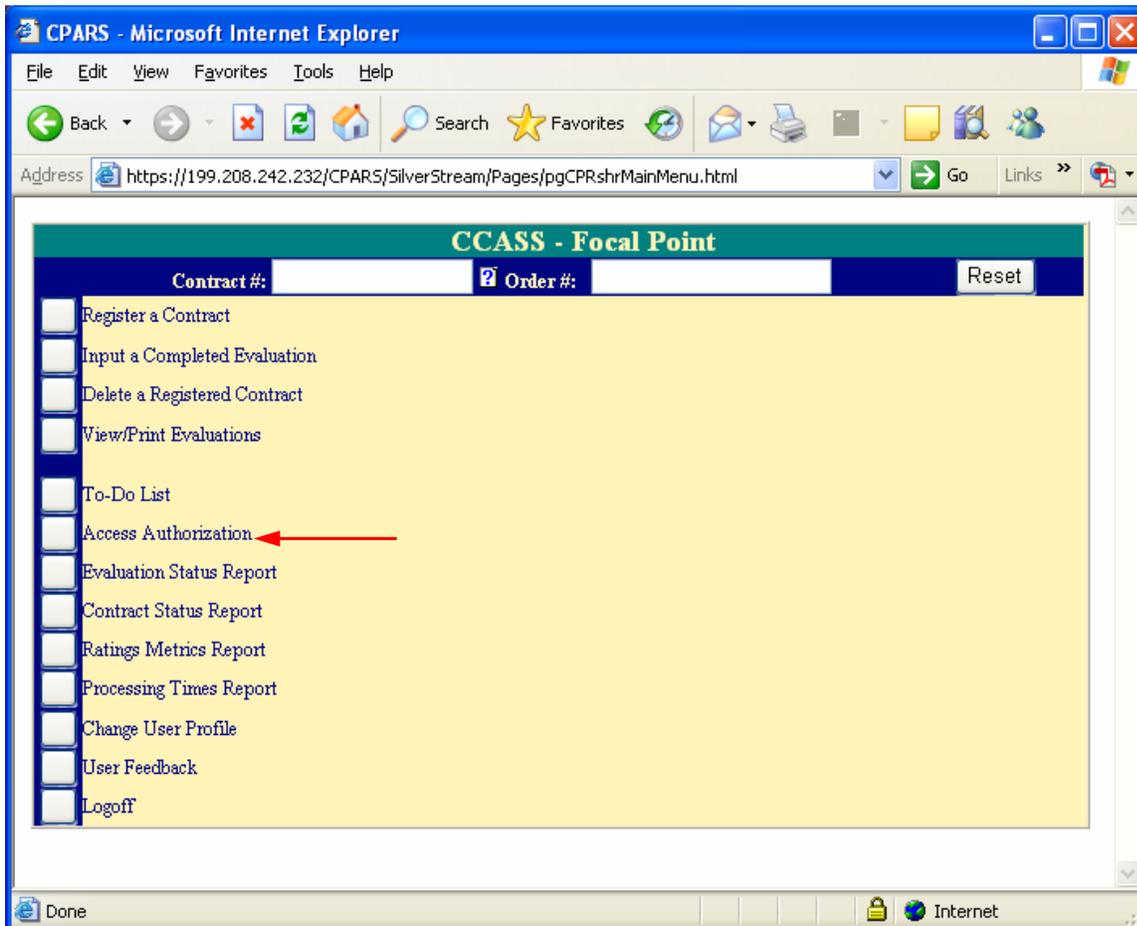

It is not necessary to **Register a Contract** in CCASS if the evaluation will be initiated in RMS then exported to CCASS. All of the data needed for an evaluation to be ready for the contractor to comment exists in RMS and will be exported to CCASS from RMS. RMS validates the data before it is exported and ensures that all of the data fields required by CCASS are completed in RMS before the evaluation will be accepted for export. Any data that may already be pre-existing in CCASS, either contract information or a draft evaluation, will be overwritten by the RMS exported data. RMS exports will have no effect on completed evaluations.

Data is exchanged between the two systems daily. RMS exports all evaluations that have been marked **Ready to be sent to CCASS** every day at approximately 1500 PST/PDT. During this action, RMS also processes the data it received from CCASS the previous day. Once an evaluation is sent to CCASS no further changes may be made to it in RMS. CCASS also exports linked evaluations daily. Only evaluations that have been initially prepared in RMS and exported to CCASS are linked and will be updated in RMS with changes made to the evaluation in CCASS.

In order to promote efficient use of the RMS-CCASS interface, it is recommended that only those individuals acting as Assessing Officials on the DD2626 be given write access to the RMS role that includes *Contractor Evaluation – Send DD2626 to CCASS*. This is a new access right in RMS.

The role of the Focal Point when RMS is used is minimal, but important. The Focal Point must assign **Access Authorization** for each contract to each of the individuals involved in the approval and review process of the evaluation in order to complete the evaluation. These individuals are the Assessing Official (Block 12), Contractor Representative, and Reviewing Official (Block 13). If the identities of the government personnel are not known, then communication with the office issuing the evaluation may be necessary. The identity of the contractor representative can be found in RMS. Assigning **Access Authorization** can be done at any time after award.

Once an evaluation is exported from RMS to CCASS, if the Assessing Official is satisfied with the contents of the evaluation as prepared in RMS, all he/she needs to do is **Validate and Send to the Contractor**. However, if changes are made to an evaluation in CCASS after it has been exported from RMS, the revised data will be exported from CCASS back to RMS during the daily file exchange. As long as the evaluations are linked, the evaluation in RMS will always match the evaluation in CCASS.

**CCASS Practice - DD2626**

1. Contract/Schedule Number: **DACA9901C0007** Task Order:  
( Click on a tab below to enter/view the related information; fields identified with \* are required )

Elapsed time = 0:35 (Page times out after 20 minutes)

If **Access Authorization** is done before the evaluation is exported from RMS, then the Assessing Official can log into CCASS after the export is executed (usually the next day) to validate and initiate the online CCASS routing and review procedures. If **Access Authorization** is not done before the evaluation is exported from RMS, then the Assessing Official needs to alert the Focal Point to enter the **Access Authorization** for the contract before he/she can complete the validation and initiate the routing to the contractor.

The status of the evaluation can easily be tracked in RMS. As each step is completed, the Evaluation Status will be updated from the data received daily from CCASS.

**AO** = Assessing Official (CCASS) = Evaluator (RMS) = Block 12 (DD2626)  
**RO** = Reviewing Official (CCASS) = Reviewer (RMS) = Block 13 (DD2626)  
**KTR** = Contractor
