RMS 3 Patch 222 Release Notes

New Features

- COVID19 delay and status codes added to all districts
- Warranty Items can now be created from start to finish. Contractors can create Warranty Items as well
- New Warranty Inspection Report that lists all the warranty item
- Contract Archive – RMS now provides information in a list to show when the contract was archived
- Contract Archive – RMS shows who archived the contract
- Contract Archive – RMS restricts archiving access to the Contract Deletion permission for Office / District Administrators
- Document Package can now accept *.IAM and *.IPT attachments
- Placement – UI Labels for Start Dates and Activity Dates redefined
- Placement – Fixed an issue with Activity Dates not going to current date if not complete and reverting to original date

Issues Fixed

- Line 5 of the PNM Template now references $2 million for CCPD
- Fixed an issue with the progress payments allowing the contractor to create a new invoice before the most recent one was approved / completed
- Fixed an issue with Monthly Progress going past Construction Completion even though being marked 100% paid
- Fixed issue where users were unable to sign documents twice as well as the ENG 93 signature block being off
- Fixed an issue with the Contract Action Items incorrectly including equipment that has been inspected already
- Fixed an issue when CM Mode cancelled the digital 4025 process and the 4025 was created anyway
- Fixed an issue with the CPAR report where several databands needed to extend when additional data was added
- Placement calculations have been refined (dealing with placement start dates before scheduled start date along with using placement start to finish for calculations)
- Fixed an issue with the Three Phase Control Worksheet misinterpreting submittal status
- Fixed an issue with the SDEF import wiping out dates when importing an SDEF schedule while having Manually Enter Start/Finish Dates in Contract Setup
- Updated the Action Items view to ignore Subcontractors that don't require insurance
- Document Package Export view now has text explaining the functionality more accurately
- Fixed an issue with the Contractor Action Items Report displaying activities that have a scheduled start date on the unscheduled activities area
- Fixed a crash in the Contract Status Sheet – Summary Version
- Fixed an issue with the Transmittal Log not maintaining the Primary Contractor Reviewer from the Submittal Register
