

RMS 3 Patch 223 Release Notes

- This patch allows the Latitude and Longitude coordinates to be modified by the user either directly or via the "Select location on map" option (which now works).
- Fixed an issue with Transmittals causing an Object Reference Not Set error during 4025 signing.
- Fixed an issue with Custom Report templates crashing when editing reports.

Below are pictures of the Latitude and Longitude with map module (Select location on Map): This is on the Contract --> Administration --> Contract Description screen. (Location below is not a real contract location, for example only).
