4025 and Government Remarks

(Import/Export → Document Package Export)

## Issues Resolved

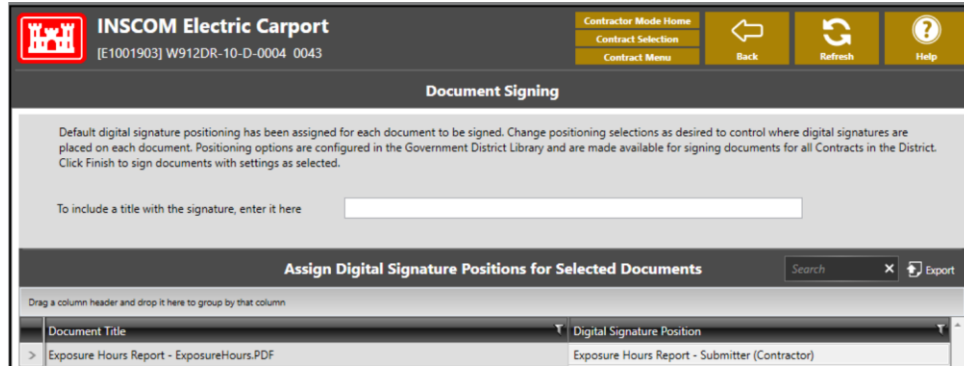

- Fixed a bug in main code branch that has to do with adding contract mods.
- Fixed a bug with the password reset code that locked accounts when it shouldn't have.
- Local Office Milestones – Fixed an issue when basing schedule events on other selected milestones, the selected milestone is different on the milestone edit view than the one chosen in the lookup.

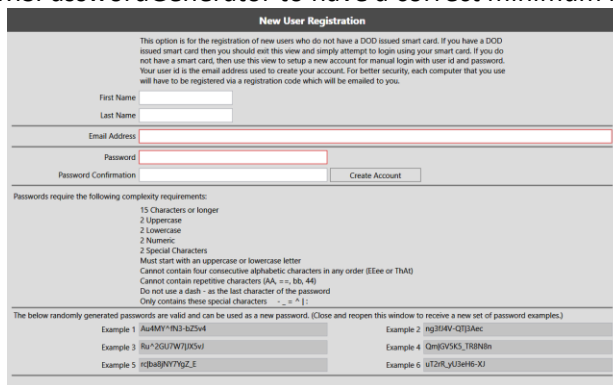

- RMS now utilizes the new 16 digit CAC Certificates and remembers the last cert used.

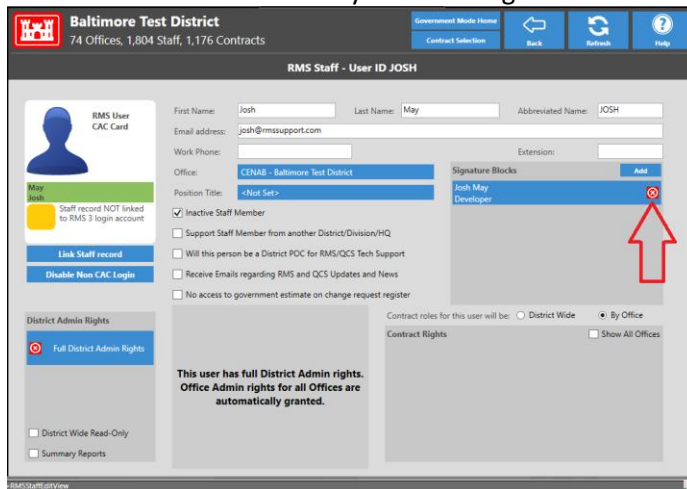

- Submittal Items linked to a Transmittal not yet completed have their Submittal Reviewer updated when updated on the Submittal Register.
- Fixed an issue where unarchiving a contract results in being unable to locate said contract.
- Fixed an issue in the Exposure Report (Monthly Record of Work-Related Injuries/Illness & Exposure) where digital signature is overlapping text on the PDF also Month and YTD figures reported are incorrect.

- Fixed an error in Construction Placement Summary Report and Placement Schedules → Actual versus Projected Placement.
- Fixed RMPassGenerator to have a correct minimum length of 15 for passwords.

- Fixed an issue Transmittal error when Gov user signs “non-keyed” document package after clicking on “apply QA Codes and Sign 4025.”
- Fixed an issue where the Government Mode Launcher fails to get a new patch when the previous patch is opened running in the background.
- RMS Staff Edit View – Fixed the ability to delete signature blocks.

- Document Package Export – All documents in the document package now download instead of just signed documents.
- Fixed an issue with Custom Reports where it was crashing when trying to copy templates.
