Fixed Status of Construction Showing 0% Actual for Non-CEFMS Contracts	7
Removed Editable Fields on 4025 after Government Signature on Some Contracts.....	8

Introduction

This document provides the details of the RMS application changes to accommodate the upgrade patch 241 which was released on August 13, 2020.

Contact

If issues or concerns should arise, please contact the Help Desk.

- Toll Free: 210-473-8658 – RMS Helpdesk Tech Support Center
- Operation Hours: 24/7, holidays excluded

Add a New Column to the QA / QC Reports View

CCB Change Request 1072.

Added the ability to see if a daily report has been signed as well as the PCF status from the QA/QC Daily Report selection view instead of having to open the daily reports one by one.

Open a Contract → QA/QC → QA or QC Daily Reports.

Drag a column header and drop it here to group by that column

Report No.	QA Report Date	QA Weather Reported	QA Report Status	QC Report Status	Contains Signed Documents	
>	489	01/28/2020 Tuesday	Weather Caused Non-Critical Delay	Completed	Not Completed by Contractor	<input type="checkbox"/>
<	232	05/16/2019 Thursday	Weather Not Entered	Not Completed		<input type="checkbox"/>
	30	10/26/2018 Friday	Previous Weather - Critical Delay	Not Completed		<input type="checkbox"/>
	29	10/25/2018 Thursday	Weather Caused Critical Delay	Completed	Completed - Received by the Gov't	<input type="checkbox"/>
	26	10/22/2018 Monday	Weather Caused Critical Delay	Completed	Completed - Received by the Gov't	<input checked="" type="checkbox"/>
	25	10/21/2018 Sunday	Weather Caused Critical Delay	Completed	Completed - Received by the Gov't	<input checked="" type="checkbox"/>
	6	10/02/2018 Tuesday	Weather Caused Critical Delay	Completed		<input type="checkbox"/>
	5	10/01/2018 Monday	Weather Caused No Delay	Completed		<input type="checkbox"/>
	4	09/30/2018 Sunday	Weather Caused Critical Delay	Completed		<input checked="" type="checkbox"/>
	0	09/26/2018 Wednesday	Weather Caused No Delay	Not Completed	Completed - Received by the Gov't	<input type="checkbox"/>

Placement Schedule – Exporting Actual vs Projected Placement Now Shows Correct Header Values

When exporting the Placement Schedule, Actual vs. Projected Placement tab (selection view) to excel the column in the excel worksheet is: “System.Windows.Controls.Textblock” instead of what the column actually should be. This has now been corrected.

Fixed a QA Report Bug that Resulted in Excessive Pages

User reported a bug where exporting all the daily reports for a contract resulted in many thousands of empty pages.

Clicking Refresh on the RMS Asset Store now Refreshes Screen

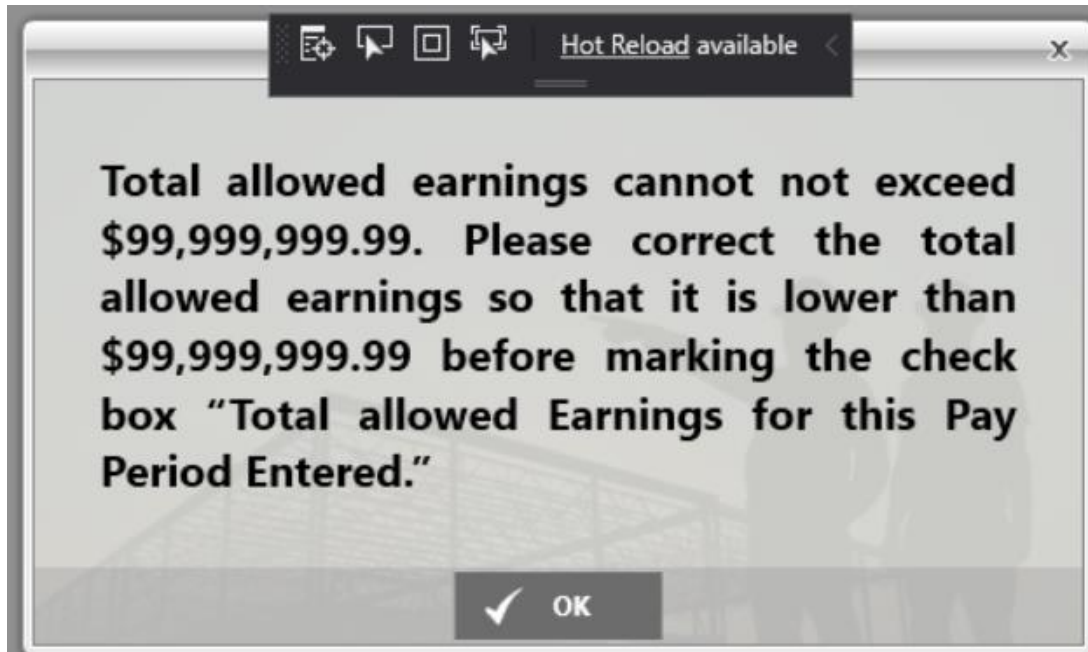

System Library → RMS Asset Store (click refresh on the top right corner of the screen). This button was not functioning properly. Now it refreshes the selection view.

Reissuing Status on QC Deficiencies Clears after being Reissued

When reissuing a deficiency, the re-issued status now clears after it is corrected.

Prevent a Payment from Processing if Over \$99,999,999.99

Due to issues with payments over \$99,999,999.99, RMS now prevents payments from being \$100 million and over in a single progress payment.

Fixed Status of Construction Showing 0% Actual for Non-CEFMS Contracts

For some contracts, the Status of Construction was showing 0% actual progress, specifically on non-CEFMS contracts. This has been fixed.

Removed Editable Fields on 4025 after Government Signature on Some Contracts

In some cases, the ENG 4025 was still editable after the Government signed the 4025. This has been fixed.
