

RMS 3.0 Patch 217 Release Notes

Placement Schedule Changes

- Placement Schedule – Fixed an issue where Start-Finish Dates for S-Curves couldn't be set. (Placement Schedule)
- Placement Schedule – Fixed an issue where the S-Curve selection disappears. (Placement Schedule)
- Placement Schedule – Fixed an issue where manual placement updates were not updating in the placement schedule.
- Placement Schedule – Fixed an issue where manual entry dates were not working in the placement schedule.
- Placement Schedule – Fixed an issue where the status color box was not working (placement schedule).
- Placement Schedule – Fixed an issue where the placement projection stops early (doesn't use finish dates).
- Placement Schedule – Fixed an issue where the compute placement button takes more than one click to set data.
- Placement Schedule – Restored the CEFMS Accrual/Reversal data screen.
- Placement Schedule – Fixed an issue with the placement curve. Starting Date and Ending Date. (Manual Placement and Assigned S-Curve).
- Placement Schedule – Fixed UI labels for starting date and ending date.
- Placement Schedule – Monthly Placement Tab – Fixed the ability to enter manual placement amounts.
- Placement Schedule – Fixed an issue with the Baseline Tab.
- Placement Schedule – Inputting a date in the future for manually computed placement no longer reassigns the finish date.
- Placement Schedule – Fixed an issue with the S-Curve index points where calculations were not matching.

Bugs/Issues Fixed

- Fixed an issue where contractor staff were unable to be deleted from the prime.
- Fixed an issue in the Contract Status Sheet showing incorrect percentage.
- Fixed a rare rounding error for foreign currency.
- QC Dredge Screen now allows scrolling for lower resolutions.
- Fixed an issue with the Contract Status Photo not always saving.
- RMS 3 now allows editing of Transmittals pending Contractor Acknowledgement
- CEIT maintenance schedule is now on the launcher and client instead of a popup.
- Fixed an issue with Transmittals not being returned correctly.
- Fixed an issue with correspondence notifications not working
- SDEF imports are no longer marked as imported when accepted.
- Fixed an issue with QC Requirements and the action items
- Fixed a problem with the SF30 report where the scope of work would not grow with the data
- Correspondence no longer auto-sets the received date.
- Fixed an issue with the QA/QC Deficiency Report not sorting in the correct order.
- Government Mode Library Reports now have the correct category assigned to them.
- Fixed an issue with the Local User Entries field not saving (Local Office --> Office User Entries).

- The Contractor Evaluation Selection View has been updated to show that CCASS and ACASS have been replaced by CPARS
- Fixed an issue with the transmittal document package manager where deleting an attachment resulted in an exception.
- Fixed an issue with the RMS Message View (notifications) resulting in excessive memory usage.
- Milestones should now update when edited without needing to close the contract.

New Items

- Archiving and Un-Archiving for RMS 3.0 contracts only is now available.
- RMS 3 will now sign and generate reports with USACE FIPS mode turned on.
- Office Administrators can now resurrect or wipe out RMS IDs for deleted users.
- Government users can now return completed Transmittals for corrections.
- CPAR Evaluation now has fields editable that were previously read only.
