1 Introduction

This document provides the details of the RMS application changes to accommodate the upgrade to patch 340, which was released on April 1, 2022. Please note this is a hotfix release.

1.1 Overview

The changes for this release are summarized below:

New Features/Changes/Issues Fixed

1. CRQ 1125 – Add ability to copy change request supporting documents to modification documents
2. RMS will now lock out failed login attempts after 3 incorrect tries
3. Transmittals in Review are no longer deleted when the Government attached document package is removed from a Transmittal in review state
4. Fixed a crash in the Government action items when a Transmittal's date sent to contractor was empty
5. Fixed an issue with the CSV report export being blank when exporting from certain Telerik reports
6. Fixed an issue in Transmittals with document packages not moving to review once a transmittal was sent to the Government
7. Fixed an issue with the PCF Status not being correctly set on the daily reports
8. Legacy Reports is no longer an option on the report screen
9. DVA quad report and modules are no longer accessible

1.2 Contact

If issues or concerns should arise, please contact the Help Desk.

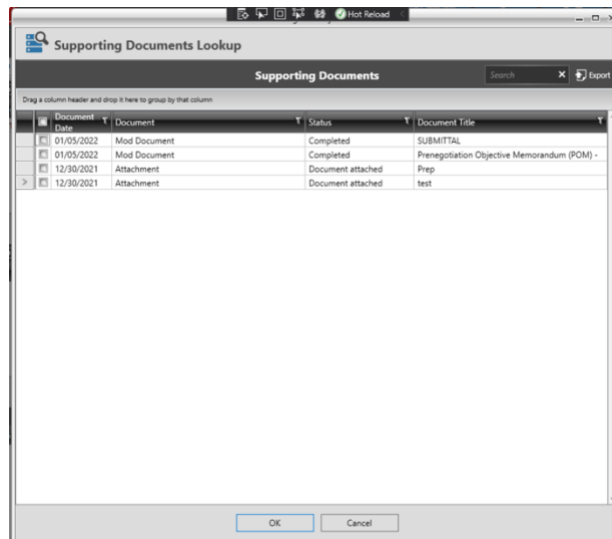

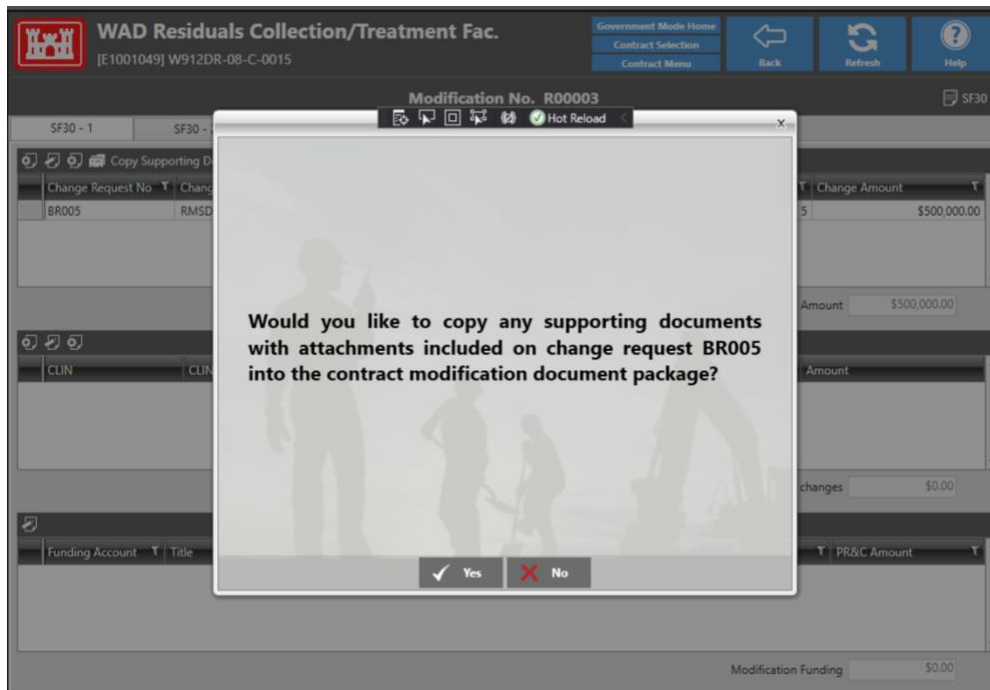

- Toll Free: 442-333-1011 – RMS Helpdesk Tech Support Center
- Operation Hours: 24/7, excluding holidays

2 New Features / Changes / Issues Fixed

1. CRQ 1125 – Add ability to copy change request supporting documents to modification documents

In the Finances → Contract Changes / Contract Modifications modules now allows supporting documents to be added to new modifications from change requests.

After adding a change request that has supporting documents a popup will show asking if the user wants to copy them over to the modification. A new document package will be added (or it will use an open document package if one already exists). Users can also use the “Copy Supporting Documents” button as well.

2. RMS will now lock out failed login attempts after 3 incorrect tries

Previously RMS allowed 5 incorrect login attempts. Now, this has been reduced to 3 incorrect attempts to comply with requirements.

3. Transmittals in Review are no longer deleted when the Government attached document package is removed from a Transmittal in Review State

Fixed a bug where Transmittals in review were being deleted when a document package was deleted that contained documents. This is in the Submittals → Transmittal Log screen in Government mode.

4. Fixed a crash in the Government action items when a Transmittal's date sent to contractor was empty

In some contracts, if there was a Transmittal without a Date sent to Contractor, the Government Action items report was crashing. This has been fixed.

5. Fixed an issue with the CSV report export being blank when exporting from certain Telerik reports

On certain Telerik reports, when exporting to excel (CSV or excel) the report was completely blank. This has been fixed.

6. Fixed an issue in Transmittals with document packages not moving to review once a transmittal was sent to the Government

In the Submittals → Transmittal Log screen in Contractor Mode, some Transmittals that had document packages on the individual Submittal items as well as in the Transmittal document package were not moving to in review when the Transmittal was completed and sent off to the Government.

7. Fixed an issue with the PCF Status not being correctly set on the daily reports

In both Government Mode and Contractor Mode issues were found with the PCF Status and Contains Signed Document status (they were not reporting correctly). This has been corrected.

8. Legacy Reports is no longer an option on the report screen

Legacy Reports have been removed in RMS. This was an option on the Contract Reports and Summary Reports screens (top right hand corner).

9. DVA quad report and modules are no longer accessible

The DVA Quad Report and corresponding modules have been removed from RMS.
