1.0 Introduction

This document provides the details of the RMS Application changes to accommodate the upgrade to patch 498, which was released on August 30, 2024.

1.1 Overview

The changes for this release are summarized below:

1. Fixed Issue Where Award CLINs Could Not be Deleted

2.0 New Features / Changes / Issues Fixed

2.1 Fixed Issue Where Award CLINs Could Not be Deleted

Location in System: Finances → Award CLINs

Problem Statement: Prior to adding any pay activities, when a user creates and funds an Award CLIN and then tries to delete the CLIN, RMS prevents the deletion. A pop up states that CLIN cannot be deleted because there are financial records are linked to a CLIN.

Note, this happens with CLINs created in mods as well. Trying to delete the CLIN in the mod will throw the same error as the award CLINs when users attempt to delete the CLIN from the origination modification.

Fix Description: Users can now delete Award CLINs and CLINs created in mods if the CLINs have not been linked to activities and they have not been paid against. If they are linked, a popup will display stating exactly what is preventing the deletion.
