1.0 Introduction

This document provides the details of the RMS Application changes to accommodate the upgrade to patch 611, which was released on June 18, 2026.

1.1 Overview

The changes for this release are summarized below:

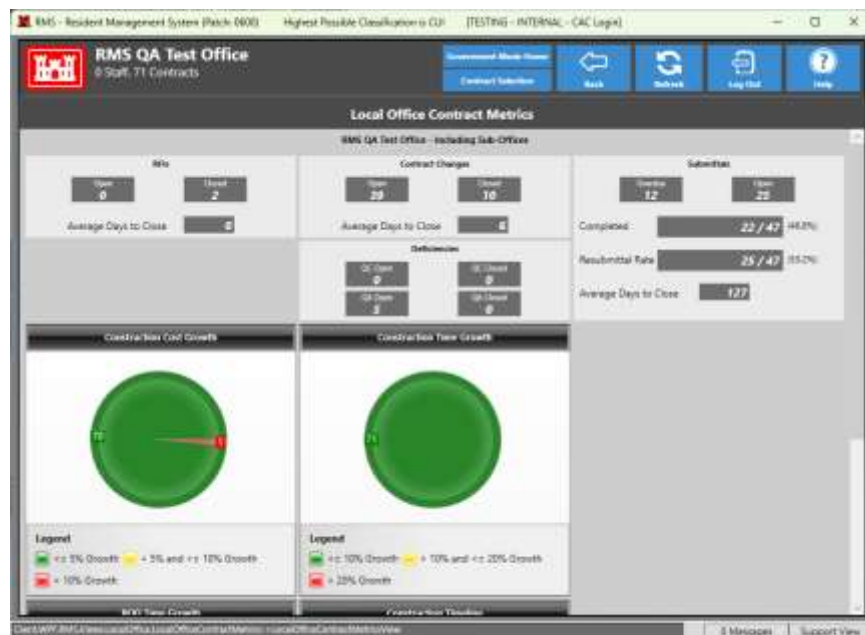

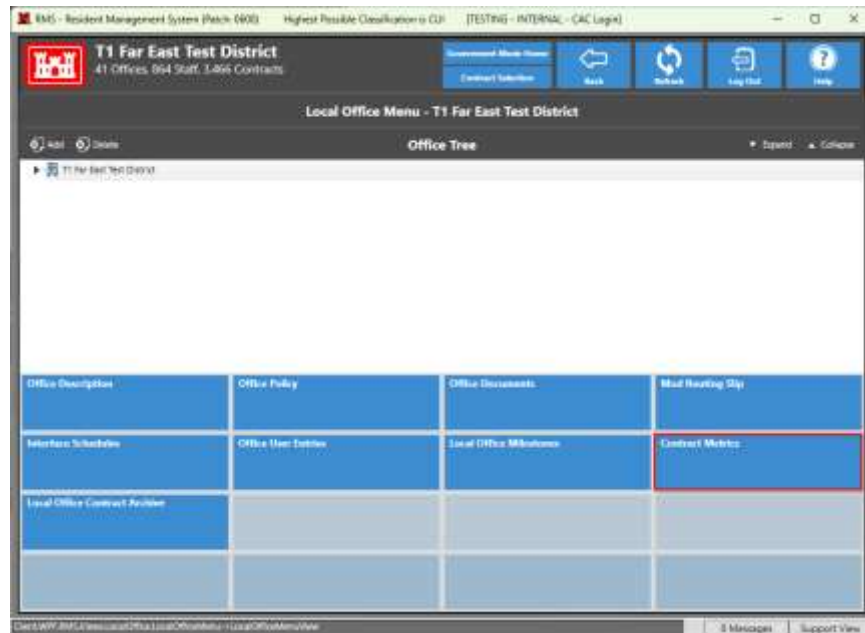

- 1: TMO-116 Metrics for Contracts
- 2: RSG-146 QA/QC Summary Photo Preview
- 3: QC Daily Report - Add Recall for Accepted Reports
- 4: RMS 2FA - Log Authentication Requests
- 5: QA Weather and QC Weather Explanations
- 6: Feature Schedule - Schedule Meetings Linked to All Features
- 7: QC Requirements - Cannot Retest QC Test
- 8: Weather Delays Showing Inaccurate Information
- 9: QC Dredge Report Menu View - Cumulative CY
- 10: Multi-Sign QA Report Generating Reports with Deficiency Items
- 11: QC Daily Reports - Equipment Hours
- 12: Future Contract Selection View - Estimate Discrepancies
- 13: QC Daily Reports - Activity Start Dates Can Change
- 14: Document Package Export - Update Date Filter Feature
- 15: Metrics Dashboard - Update Counts when Action is Completed
- 16: Document Package - Lock RMS Screen when Signing Documents
- 17: Increase Characters for Steps Field for AHAs
- 18: Summary Reports - Exception Error
- 19: QC Daily Report - Deficiency Changes Not Populating to Facsimile
- 20: Features of Work Cannot be Added with Manual Activity Schedule
- 21: Progress Payments - Data Validation on Allowed Fields
- 22: Progress Payments - Recalculation of Changes to Activity Amounts between Invoices Prevents Updates
- 23: QC Requirements - Selection List Allows Delete
- 24: Gov User Role Permissions - Update Safety Specialist
- 25: QC Requirements - Lock Status Updates
- 26: Three Phase Control Worksheet Preparatory Report - Error in QC Requirements Section

2.0 New Features / Changes / Issues Fixed

2.1 TMO-116 Metrics for Contracts

Location in System: Local Office → Contract Metrics

Update Statement: RMS now has a summary view in the Local Office to show Contract Metrics.

2.2 RSG-146 QA/QC Summary Photo Preview

Location in System: QA/QC → QA/QC Summary

Update Statement: In the QA/QC Summary module when selecting the Images filter in the Attachments section, RMS now shows previews of the images in the grid list.

The screenshot shows the 'QA Summary' module in the RMS system. The interface includes a header with the system name 'RMS - Resident Management System (Patch: 0403)' and the user 'Highest Possible Classification is CUP [TESTING - INTERNAL - CAC Login]'. The main content area is divided into several sections:

- QA Tests:** A tree view showing 'QA Tests' with a total of 1, and sub-items 'Completed' (0) and 'Not Completed' (1).
- QA Final Follow-Up:** A tree view showing 'QA Final Follow-Up' with a total of 331, and sub-items 'Completed' (324) and 'Not Completed' (7).
- QA Requirements:** A tree view showing 'QA Requirements' with a total of 6, and sub-items 'Completed' (6) and 'Not Completed' (0).
- Mishaps Reported by QA:** A tree view showing 'Mishaps Reported by QA' with a total of 0, and sub-items 'Records' (0) and 'Not Records' (0).
- QA Attachments:** A table showing the number of attachments by date, with a total of 763. The 'Images' row is highlighted with a red box, showing 7 images.

Below the summary sections is a table titled 'Image QA Attachments' with columns for 'Preview', 'Date Created', 'Title', and 'Status'. The first row shows a preview of an image, the date '04/16/2018', the title 'QA Daily Report No. 1196 - IAS_0675.JPG', and the status 'Document Attached'.

The screenshot shows the 'QC Summary' module in the RMS system. The interface includes a header with the system name 'RMS - Resident Management System (Patch: 0403)' and the user 'Highest Possible Classification is CUP [TESTING - INTERNAL - CAC Login]'. The main content area is divided into several sections:

- Activities Started/Finished:** A tree view showing 'Activities Started/Finished' with a total of 332, and sub-items 'Started' (332) and 'Not Started' (0). The 'Started' item further branches into 'Finished' (331) and 'Not Finished' (1).
- QC Requirements:** A tree view showing 'QC Requirements' with a total of 6, and sub-items 'Completed' (6) and 'Not Completed' (0).
- Mishaps Reported by QC:** A tree view showing 'Mishaps Reported by QC' with a total of 1, and sub-items 'Records' (0) and 'Not Records' (1).
- QC Attachments:** A table showing the number of attachments by date, with a total of 124. The 'Images' row is highlighted with a red box, showing 12 images.

Below the summary sections is a table titled 'Image QC Attachments' with columns for 'Preview', 'Date Created', 'Title', and 'Status'. The first row shows a preview of an image, the date '11/15/2018', the title 'QC Daily Report No. 1380 - Pre_action air test 181114_00_34.jpg', and the status 'Document Attached'.

2.3 QC Daily Report - Add Recall for Accepted Reports

Location in System: QA/QC → Daily Reports

Update Statement: After the Government has accepted a QC Daily Report, RMS now allows the report to be recalled to a state prior to being Accepted.

RMS - Resident Management System (Patch: 0400) Highest Possible Classification is CUI

Temp (11064124)

QC Daily Report No. 301, 03/30/2026 - Monday

Weather: Caused No Delay

QC Narratives

QC/GA Deficiencies

QC Recommendations

Physical Inspections

Project: Temp
Contract Number: 11064124
Contractor: The Ranger Group, LLC

QC Weather

Weather Caused No Delay
Temperature Min 0 °F Max 0 °F
No Precipitation No Wind

QC narratives

No QC narratives entered today

QC Daily Report No. 0301 CONTRACTOR: Completing the report will also submit the document package. Ensure all signatures are included.

2.4 RMS 2FA - Log Authentication Requests

Location in System: Login

Update Statement: When logging into the RMS client with a password, authentication code requests and code submission acceptance needs to be logged the database. This data is for internal purposes only.

RMS - Resident Management System (Patch: 0997) Highest Possible Classification is CUI [TESTING - INTERNAL - CAC Login]

2.5 QA Weather and QC Weather Explanations

Location in System: QA/QC - Reports Module/submodules

Problem Statement: In the Daily Reports, when weather explanations were set to Other – Explain, the explanation for QA weather was being saved to both the QC and QA report.

Fix Description: This has been fixed. An explanation added in QC reports will not show in QA reports, and vice versa.

Previously:

The screenshot shows the 'Inspectors Quality Control Report (QAR) - Daily Log of Construction' interface. At the top, it says 'QA Daily Report No. 460 Dated 03/20/2026 Friday - Military Weather'. Below this, there is a dropdown menu for 'QA Weather' set to 'Other - Explain'. A text box for 'Weather Explanation' contains the text 'QT 80M/C/C-1801 - Entered in QC Daily Report'. Below this, there are input fields for 'QA Min. Temp', 'QA Max. Temp', 'QA Precipitation', and 'QA Wind Speed', all set to 0. The interface also includes navigation buttons like 'Back', 'Refresh', 'Log Out', and 'Help'.

Currently:

The screenshot shows the same 'Inspectors Quality Control Report (QAR) - Daily Log of Construction' interface. The 'QA Weather' dropdown is still set to 'Other - Explain'. The 'Weather explanation' text box is empty. Below this, there are input fields for 'QA Min. Temp', 'QA Max. Temp', 'QA Precipitation', and 'QA Wind Speed', all set to 0. The interface also includes navigation buttons like 'Back', 'Refresh', 'Log Out', and 'Help'.

2.6 Feature Schedule - Schedule Meetings Linked to All Features

Location in System: Schedules → Feature Schedule

Problem Statement: All Feature Schedule Meetings were showing up for all features with no way to link them to individual features.

Fix Description: Meeting Schedules for features are now filtered based on the feature of work.

Previously:

Feature Schedule - ACCESS FLOORING SYSTEM

Preparatory

Date Time

Scheduled Select a date AM PM

Hold Select a date AM PM

Initial

Meeting Schedule

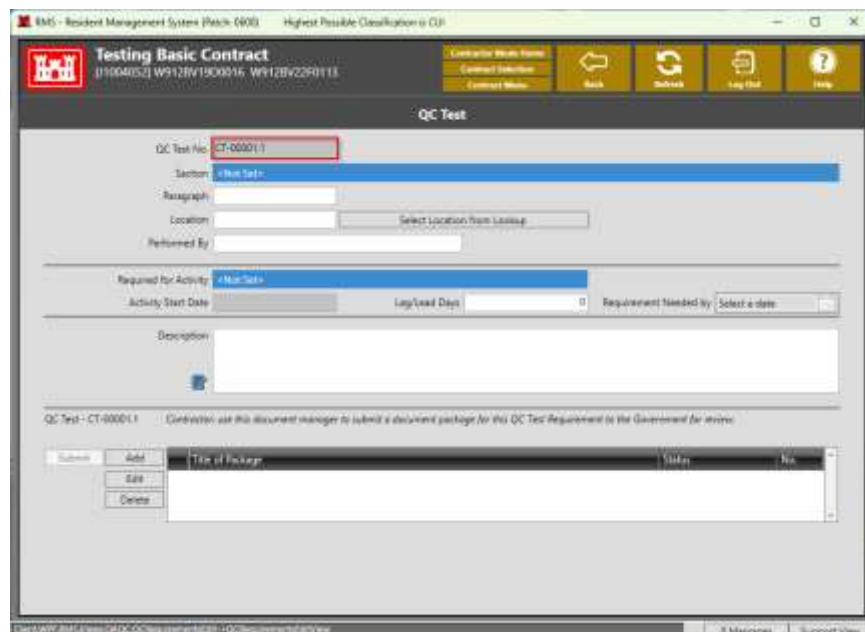

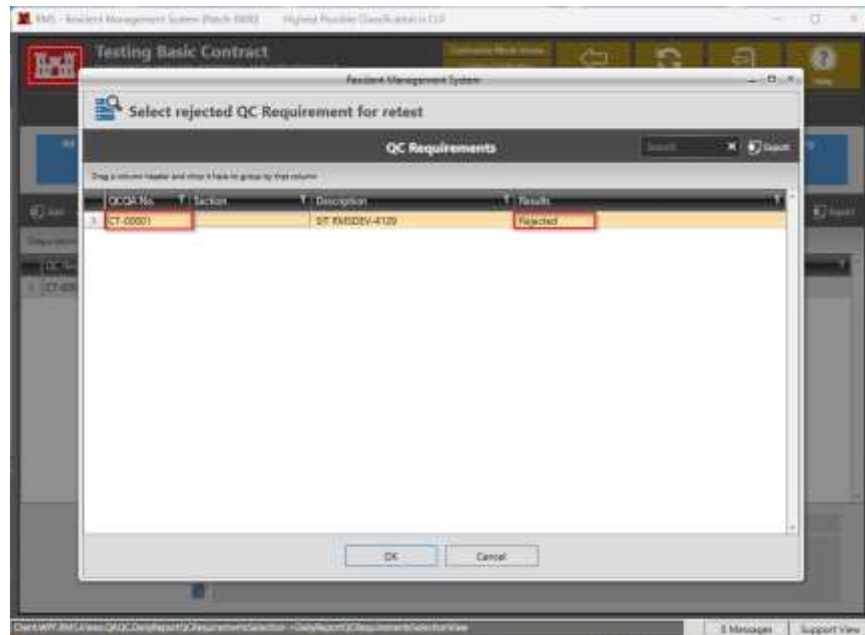

Preparatory Insp Date	Initial Insp Date
-----------------------	-------------------

2.7 QC Requirements – Cannot Retest QC Test

Location in System: QA/QC → QC Daily Report → QC Tests

Problem Statement: Users are unable to retest QC tests after rejection.

Fix Description: Add a lookup for rejected QC tests to be retested and add a suffix to the new QC Test No. to indicate it is a retest (same principle as re-transmittals).

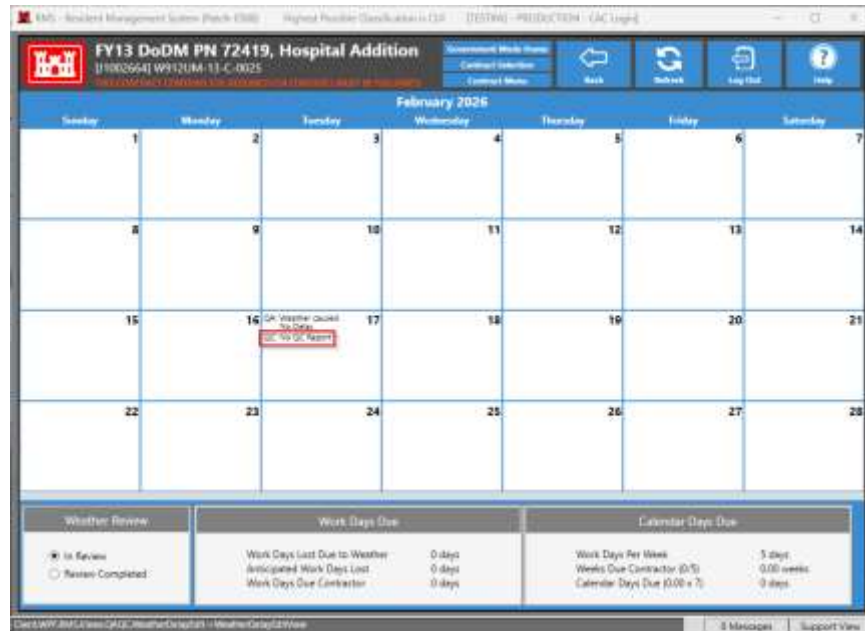

2.8 Weather Delays Showing Inaccurate Information

Location in System: QA/QC → Weather Delays

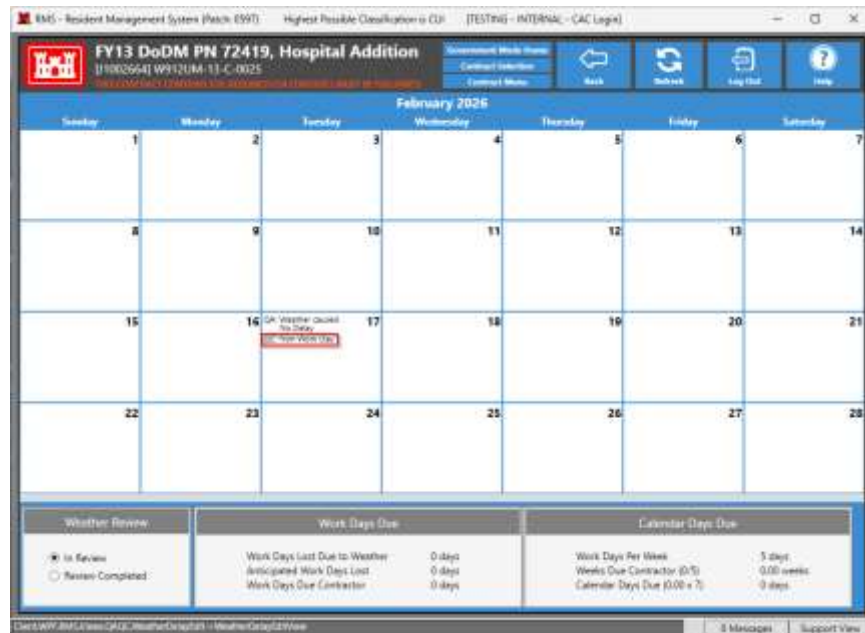

Problem Statement: When a QC Daily Report has the weather marked as a Non Work Day, the Weather Delays module displays "No QC Report" when there is a daily report for that day.

Fix Description: Correct the variable value assigned in the view to match the report.

Previously:

Currently:

2.9 QC Dredge Report Menu View - Cumulative CY

Location in System: QA/QC → Dredging Daily

Problem Statement: In the QC Dredge Reports, the Cumulative CY field always remains empty, while in the report shown when clicking on the Form 4267 button, there is a number greater than 0 when CY was entered in previous dredge reports.

Fix Description: This has now been fixed, and the Cumulative CY field will reflect the cumulative values entered in previous dredge reports.

Previously:

The screenshot shows the 'Dredge Daily Report No. 1' for the project 'FY08 MCA, PN 587B4, Brigade HQ Complex'. The report is dated 01/03/2022. The 'Cumulative CY' field is highlighted with a red box and is empty. The 'CY Deposited Gross' field shows a value of 100. The 'QC Dredge Report' section at the bottom indicates that the report is not ready for submission.

Currently:

The screenshot shows the 'Dredge Daily Report No. 3' for the same project, dated 04/01/2025. The 'Cumulative CY' field is highlighted with a red box and now shows a value of 100. The 'CY Deposited Gross' field also shows a value of 100. The 'QC Dredge Report' section at the bottom indicates that the report is not ready for submission.

Location in System: QA/QC - Reports Module/submodules

Fix Description: This has been fixed, and only the QA deficiencies for each daily report will be displayed.

[illegible]

2.11 QC Daily Reports - Equipment Hours

Location in System: QA/QC – QC Daily Report → Labor/Equipment Hours

Problem Statement: When selecting to Copy from Previous Day, data selected on the previous day's QC Daily Equipment hours presents the ORA-01400 error or updates with blank information on some reports.

Fix Description: This has been fixed, and the hours will copy with no errors.

Previously:

Currently:

The screenshot shows the same web application window, but now the "Equipment Hours" report is displayed. The report title is "Labor/Equipment Hours for Report No. 1162 Dated 03/25/2026 Wednesday". The "Equipment Hours" tab is selected. The report displays a table with the following data:

Item	Serial Number	Description	Labor Hours	Operating Hours
00000002			3	6
00000004	4087	Equipment g/p	2	4
00000005	123456	Equipment left log entered	6	9
00000006	3445	Equipment without authorized hours	7	6
00000008	1234	Equipment without hours left (5 for sure)	1	5

The bottom status bar shows "Client: WY-AMU-User: QACQC-CenterEquipmentHours - QACQC-CenterEquipmentHoursView" and "5 Messages Support View".

2.12 Future Contract Selection View - Estimate Discrepancies

Location in System: Finances → Contract Finances

Problem Statement: When a user adds a P2 Project to a future contract with estimated amounts, then removes it and changes the estimate, the Estimated Contract Amount field does not match the Estimated Amount column in the table when the project is re-added.

Fix Description: This has been fixed with a backend re-compute.

RMSDEV-4299
(11004139)

Future Contract Selection

Projects

Project ID	Tail Code	Project Title	Estimated Amount
121007	44300		\$450,000.00

Estimated Contract Amount: **\$450,000.00**

Probability of being awarded: ☐ High ☒ Medium ☐ Low

3 Messages Support View

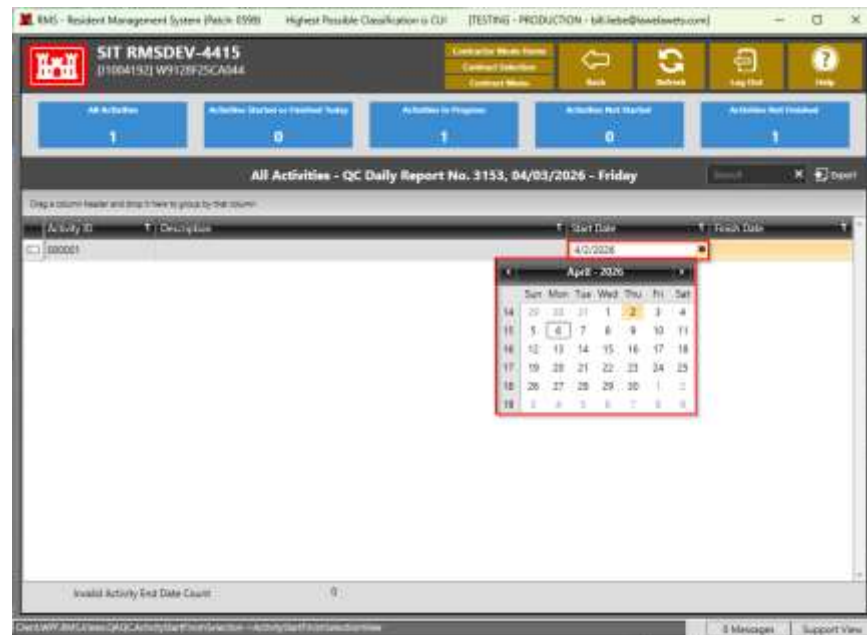

2.13 QC Daily Reports - Activity Start Dates Can Change

Location in System: QA/QC → Reports Module/submodules

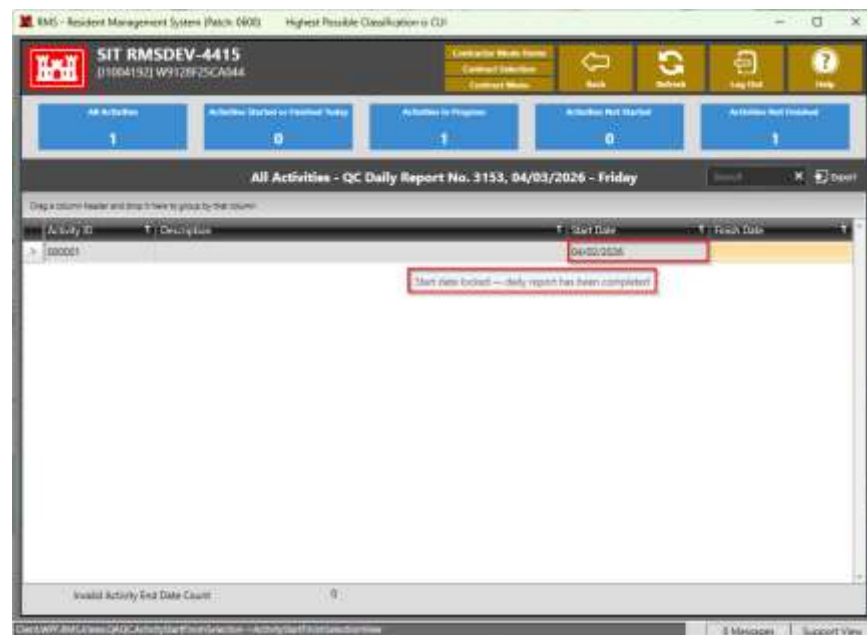

Problem Statement: Users can change the activity Start Date in future daily reports until the activity Finish Date is entered. This can lead to confusion and inaccuracies in reporting.

Fix Description: Once the activity Start Date is entered on a QC daily report, it will no longer be changeable.

Previously:

Currently:

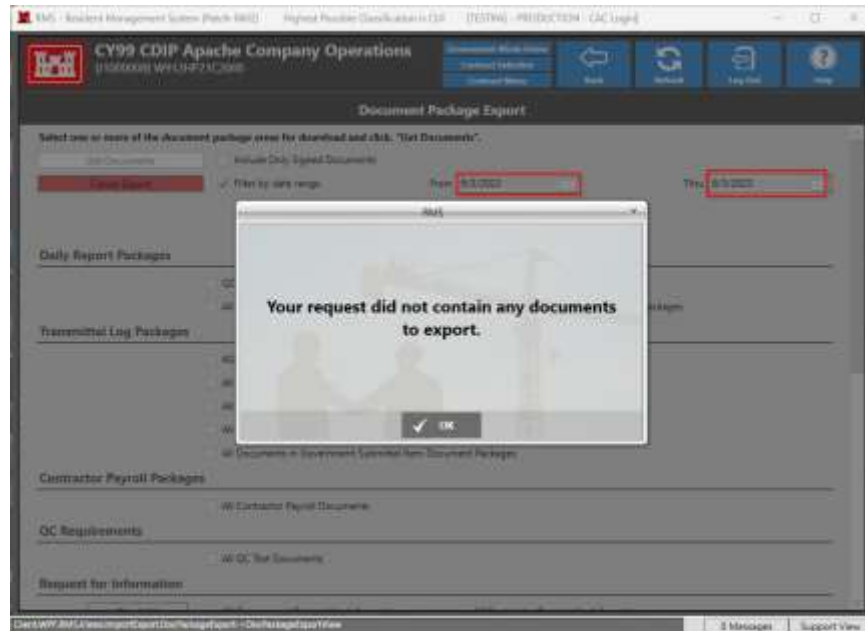

2.14 Document Package Export - Update Date Filter feature

Location in System: Import → Document Package Export

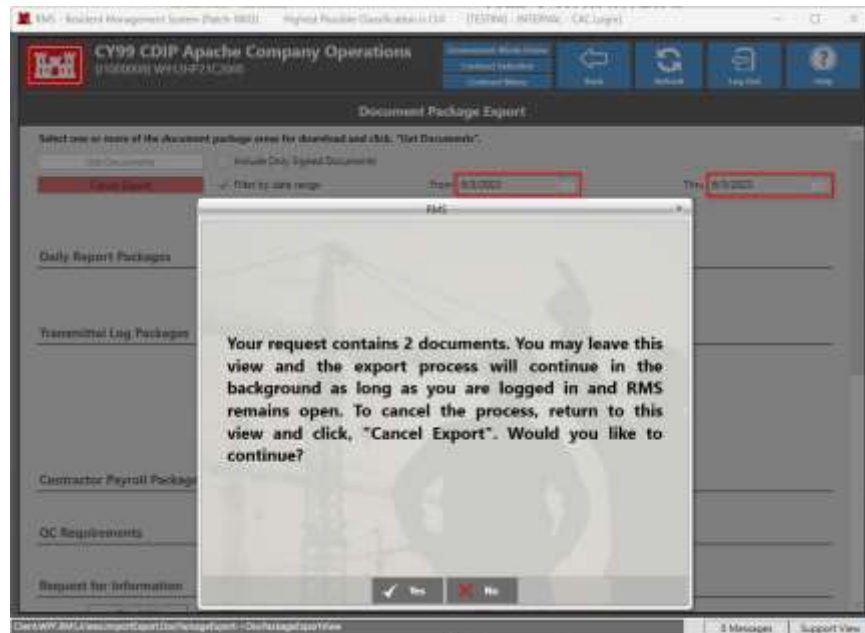

Problem Statement: Using the same date in both the From date and To date generally results in no documents exported.

Fix Description: This has been fixed. Documents from the date entered will export properly.

Previously:

Currently:

2.15 Metrics Dashboard - Update Counts when Action is Completed

Location in System: Metrics Dashboard

Problem Statement: When changes are made, such as adding and cancelling a change request or adding an RFI, the counts for the Contract Status Metrics do not update until the user backs out to Contract Selection and re-enters the contract.

Fix Description: RMS now has change detection processing to update the Contract Status Metrics after closing modules.

2.16 Document Package - Lock RMS Screen when Signing Documents

Location in System: Document Packages

Problem Statement: When users try to sign large files, RMS takes some time to process the signature but lets users click the Finish button repeatedly. This leads to RMS crashing with a fatal error.

Fix Description: This has been fixed and an error like this will not occur when signing large files.

2.17 Increase Characters for Steps Field for AHAs

Location in System: QA/QC → Hazard Analysis

Problem Statement: When entering Activity Hazard Analysis data in the Hazard Steps fields, the Job Steps field is limited to 255 characters. Since this field indicates it is a list of steps, it would be beneficial for this field to be of a larger size like the other fields next to it, Hazards and Actions to Eliminate or Minimize Hazards.

Fix Description: The Job Steps field can now hold up to 32k bytes.

Location in System: Reports

Problem Statement: For some users, RMS would crash when previewing Summary Reports specifically with the Construction Placement for Selected FY report.

Fix Description: This has been fixed, and this report will generate without crashing RMS.

[illegible]

2.19 QC Daily Report - Deficiency Changes Not Populating to Facsimile

Location in System: QA/QC → QC Daily Report

Problem Statement: In the QC Daily Report facsimile, the QA/QC Deficiency section does not update when changes are made using the QC/QA Deficiencies submodule, even though the changes populate in the QC Daily Report preview.

Fix Description: This has been fixed. The report facsimile will update as changes are made in the submodules.

Previously:

The screenshot shows the QC Daily Report interface for Non-CEFMS Contract 1. The QA/QC Deficiency section is highlighted with a red box and contains the text: "No deficiency items issued/corrected today".

QC Daily Report No.	Contractor	Status	No.
QC Daily Report No. 0087		Not Ready	1

Currently:

The screenshot shows the QC Daily Report interface for Non-CEFMS Contract 1. The QA/QC Deficiency section is highlighted with a red box and contains a table with one row:

Item No	Location	Description
QC-00001	UT-0000	UT-000000-0000

Below the table, it says "No deficiency items corrected today".

QC Daily Report No.	Contractor	Status	No.
QC Daily Report No. 0087		Not Ready	1

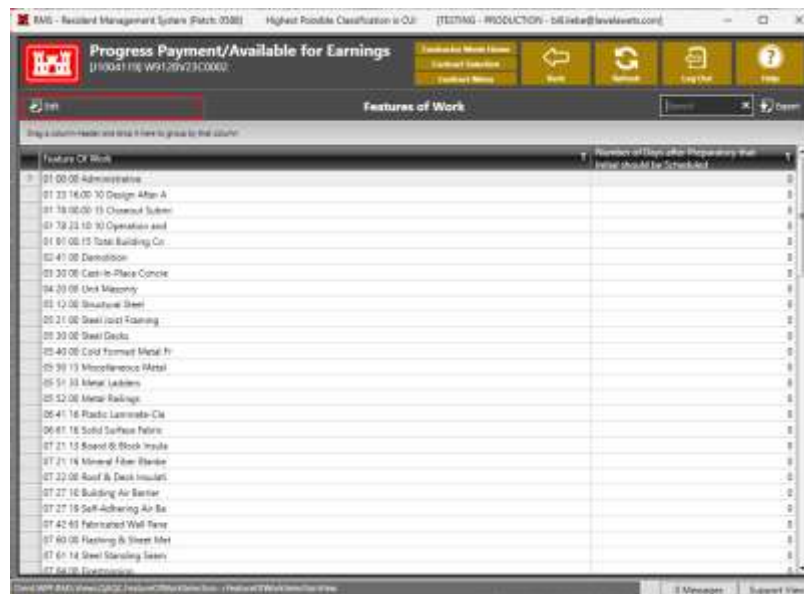

2.20 Features of Work Cannot be Added with Manual Activity Schedule

Location in System: Administration → Contract Setup

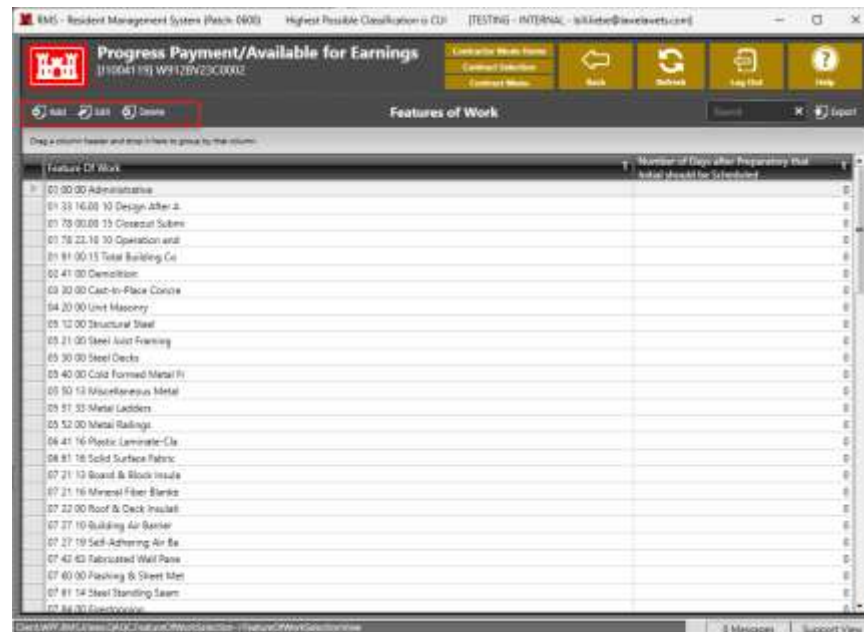

Problem Statement: When a contract that was previously set up to import the activity schedule is then switched to manually enter the schedule start/finish dates, Contractors are still unable to manually add or delete Features of Work in the Features of Work module.

Fix Description: This has been fixed. When the Manually Enter the Schedule Start/Finish Dates option is set in Contract Setup, Contractors can manually add features in the Features of Work module regardless of what was set before.

Previously:

Currently:

2.21 Progress Payments – Data Validation on Allowed Fields

Location in System: Finances → Progress Payments

Update Statement: RMS now restricts users from entering amounts that exceed the allotted budgets for an activity.

Allowed % and Allowed Qty will also show error if an amount greater than allowed is entered

2.22 Progress Payments - Recalculation of Changes to Activity Amounts between Invoices Prevents Updates

Location in System: Finances → Progress Payments

Problem Statement: Some contracts were having issues with recalculations wiping out changes in the invoice.

Fix Description: This has been fixed. When recalculations occur, changes already made by users in the invoice will be retained.

Previously:

Activity No.	Description	Previous %	Previous Amount	Requested %	Requested Amount	Requested Amount	Requested Amount

2.23 QC Requirements - Selection List Allows Delete

Location in System: QA/QC → QC Requirements

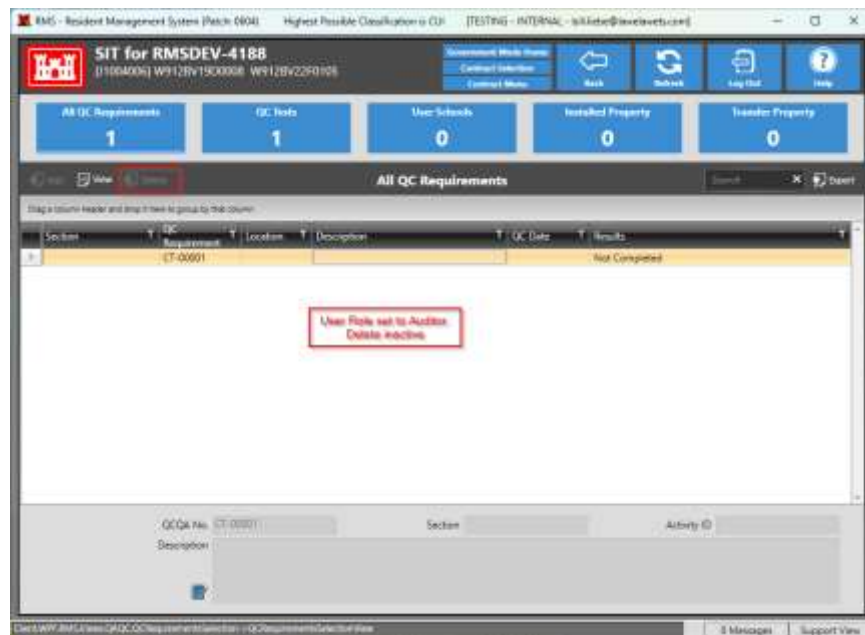

Problem Statement: RMS was allowing a read-only permission to delete a QC Requirement.

Fix Description: The permissions for the impacted user role has been fixed.

Previously:

Currently:

2.24 Gov User Role Permissions - Update Safety Specialist

Location in System: User Roles

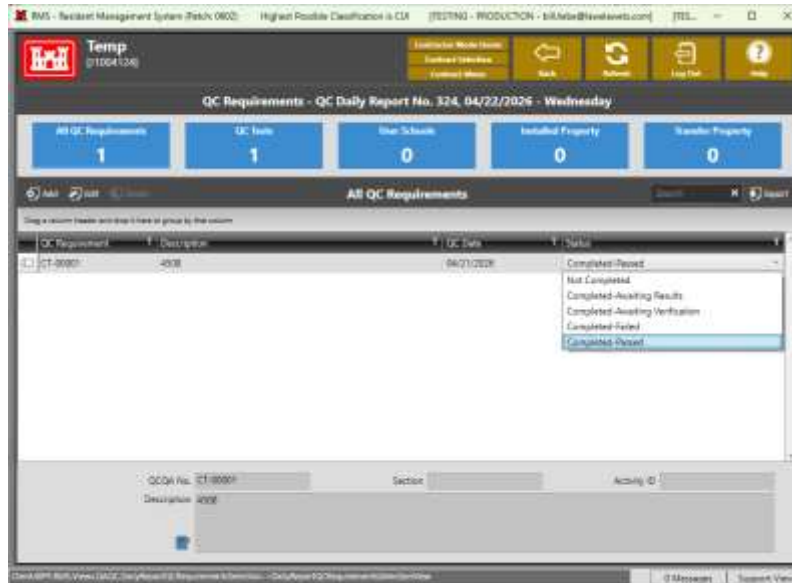

Update Statement: The Government User Role – Safety Specialist now has read-only permission to the Submittal Register and read/write permission to the Transmittal Log.

2.25 QC Requirements - Lock Status Updates

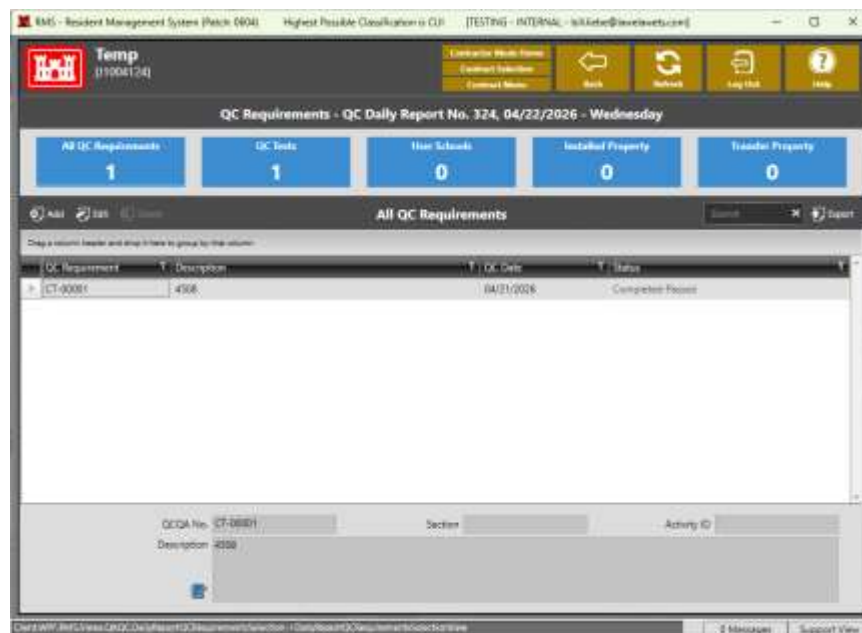

Location in System: QA/QC → Daily Reports → QC Requirements

Update Statement: RMS now locks a QC test that has the status of Completed-Passed.

Previously:

Currently:

2.26 Three Phase Control Worksheet Preparatory Report - Error in QC Requirements Section

Location in System: QA/QC → Three Phase Inspections

Problem Statement: Users are seeing an error under the B. Quality Control Requirements section when attempting to open the Three Phase Control Worksheet Preparatory report in a contract that has QC Requirements.

Fix Description: This has been fixed, and this error will no longer appear.
